 Stands for fairs and shows - design and setup 

Powered by **EUROPAGES**

Scarabeo presents ETRA, a new line of ceramic washbasins characterized by a simple and essential design where important flat borders stand out giving geometricity to the washbasin and acting as support plans.

Conceived for both residential and contract bathrooms, ETRA washbasins introduce very pleasant proportions where edges are reduced to minimum thanks to the delicate roundings of the basin and borders and they can be chosen either with flat lateral edges or with an edge thicker than the other in order to make a better use of the surface.
